

PROFILE SUMMARY

Data Analyst with hands-on expertise in SQL, Power BI, Excel, and Python for transforming large datasets (500K+ records) into actionable business intelligence. Skilled in data cleaning, EDA, KPI analysis, dashboard development, and stakeholder reporting. Proven ability to deliver data-driven insights through interactive visualizations, trend analysis, and business analytics.

SKILLS

Databases & SQL: SQL (JOINS, GROUP BY, Subqueries, CTEs, Window Functions, Query Optimization) • MySQL • Data Warehouse Concepts
Business Intelligence: Power BI (DAX, Power Query, Data Modeling, KPI Reporting, Interactive Dashboards, Drill-through Reports) Excel (Pivot Tables, VLOOKUP, XLOOKUP, INDEX MATCH, Conditional Formatting) • Data Visualization & Storytelling
Programming & Analysis: Python (Pandas, NumPy, Matplotlib, Seaborn) • EDA • Statistical Analysis • Root Cause Analysis
Data Management: Data Cleaning • Data Wrangling • Data Transformation • ETL • Data Quality Assessment • Requirements Gathering
Tools: Power BI Desktop • Jupyter Notebook • Google Colab • GitHub • Microsoft Excel
Core Competencies: Business Intelligence • Business Analysis • KPI Analysis • Trend Analysis • Stakeholder Reporting • Data-Driven Decision Making

WORK EXPERIENCE

LV Prasad Eye Institute, Product Development Engineer Intern full-time(On-site) | Jan 2023 – Sep 2023 |Project name: MODSL Responsibilities:

- Operated Modular Slit Lamp device and loaded 500+ corneal images into Python-based diagnostic pipeline for automated topographic mapping and data analysis.
- Validated corneal topography outputs, identifying data patterns and accuracy issues to support clinical decision-making and healthcare data interpretation.
- Collaborated with engineering and ophthalmology teams to gather requirements, define project scope, and document technical findings throughout product development lifecycle.
- Synthesized vast streams of raw diagnostic data into actionable clinical insights, empowering the medical team to identify critical healthcare data trends and elevate diagnostic

PROJECTS

Pizza Sales Analysis | SQL & Business Analytics | [View Project](#)

- Executed advanced SQL queries (JOINS, GROUP BY, aggregation functions, window functions) on 48,000+ pizza orders to identify top 5 best-selling products and peak order windows (8 PM–10 PM).
- Analyzed sales trends across product categories to identify top revenue-generating products and demand patterns.
- Prepared a report summarizing sales trends and demand patterns to support menu pricing and promotional planning.

Mobile Sales Dashboard | Power BI & Business Intelligence | [View Interactive BI Dashboard](#)

- Built interactive Power BI dashboard integrating 100,000+ sales records with DAX measures for MoM/YoY analysis, KPI tracking, and data modeling.
- Created drill-through reports that allowed users to analyze sales performance by device model, region, and payment method.
- Provided KPI dashboards and reports to support sales monitoring across brands and regions.

Vrinda Store Sales Dashboard | Excel & Data Analysis | [View Project](#)

- Performed end-to-end data cleaning on 31,048 e-commerce records (duplicate removal, null-value handling, format standardization) and built Pivot Tables for sales analysis.
- Identified Amazon (36%) as the top-performing sales channel, Adult women as the primary customer segment, and Kurta as the highest revenue-generating product category.
- Designed an Excel dashboard with dynamic charts, slicers, and KPIs to track seasonal sales trends and delivery performance across states.

Black Friday Sales Analysis | Python & Exploratory Data Analysis | [View Project](#)

- Conducted end-to-end EDA on 500,000+ transaction records using Python (Pandas, NumPy, Matplotlib, Seaborn) with data cleaning, outlier detection, and feature exploration.
- Performed customer segmentation analysis and identified 3 customer groups, with male shoppers aged 26–35 in Tier-B cities contributing 42% of total revenue.
- Identified the top 3 product categories and presented findings through visual reports to support inventory planning and marketing campaigns.

EDUCATION

B.E. in Electronics & Communication Engineering

2022

Methodist College of Engineering & Technology, Osmania University | CGPA: 7.59/10

Diploma in Electronics & Communication Engineering

2019

Quli Qutub Shah Polytechnic, Osmania University | CGPA: 9.0/10

CERTIFICATIONS & TRAINING

- Product development engineer internship - LVPEI centre for innovation and technology
- Python for Data Science – CloudyML
- SQL Certification – CloudyML (June 2026)
- Data Science Program (In Progress) – CloudyML
- Industrial Training in Electronics – ECIL
